

Walt Davis & Dr. Richard Teague

Experts in the benefits of planned grazing and the science behind it

October 18, 2018 · 9:00 AM – 4:00 PM

Performing Arts Building at NCTC in Gainesville

\$10 Registration Fee, lunch included

Please join us for a workshop about biological capital, planned grazing, relationships between forage and grazing animals, and how to plan for drought recovery.

Walt Davis is a fifth generation rancher, who teaches, consults and writes. His experience and knowledge offer a bridge to manage your property for soil health and high animal performance.

The grazing management that is most beneficial to the land is also the type that is best for the animals. – Walt Davis

Dr. Richard Teague will be speaking about the science behind planned grazing and how it will improve your pastures and animal performance. Dr. Teague is a range ecologist joining Texas A & M AgriLife Research and Extension Center in 1991. He has practical and research experience in grazing management systems.

Payment can be made online or at the door.

Cash or Credit/Debit Card.

You can register by emailing Melissa Bookhout at mbookhout@dixonwater.org
